GETTC-API-001

positive test for GET /booking/{id}

/booking/{id}

Positive

High Priority

HTTP 200

PRECONDITIONS

1. The API is available at the configured server.

STEPS

1. Send a GET request to /booking/{id}.

2. Capture the response and verify the result.

EXPECTED RESULT

HTTP 200 — The API responds with HTTP 200 and a valid response for the positive scenario.

REQUEST DATA

```
{  "headers": {    "Accept": "application/json"  },  "pathParameters": {    "id": 1  },  "queryParameters": {}}
```
