

Scenario 1 — Search Functionality (E-commerce App)

I - Instruction: Generate test cases for search functionality

C - Context:

User searches for products in an e-commerce web application. Features include keyword search, auto-suggestions, filters (price, category), sorting (low to high, popularity), and handling empty/invalid inputs.

E - Example:

Search keyword: "iPhone"

P - Persona: Act as Senior Test Engineer

O - Output Format: Test cases in table (ID, Scenario, Steps, Expected Result, Priority)

T - Tone: Professional, concise, practical

Test Cases:

ID	Scenario	Steps	Expected Result	Priority
TC01	Valid search keyword	Enter "iPhone" → Click Search	Relevant products displayed	High
TC02	No result search	Enter "xyz123abc"	"No results found" message	High
TC03	Empty search	Click search without input	Validation or trending products shown	Medium
TC04	Filter functionality	Apply price filter	Results updated correctly	High
TC05	Sorting	Sort by price low-high	Results sorted correctly	High
TC06	Auto-suggestion	Type "iph"	Suggestions displayed	Medium
TC07	Special characters	Enter "@#\$%"	Handled gracefully	Medium
TC08	Performance	Search large keyword	Results < 2 sec	High

Scenario 2 — File Upload (Web Portal)

I - Instruction: Generate test cases for file upload

C - Context:
User uploads documents (PDF, JPG, PNG). Max size 5MB. Security checks required.

E - Example:
Upload "resume.pdf" (2MB)

P - Persona: Act as Senior Test Engineer

O - Output Format: Table

T - Tone: Security-focused, detailed

Test Cases:

ID	Scenario	Steps	Expected Result	Priority
TC01	Valid file upload	Upload PDF <5MB	Upload successful	High
TC02	Unsupported format	Upload .exe file	Upload rejected	High
TC03	File size exceeded	Upload >5MB	Error message shown	High
TC04	Empty upload	Click upload without file	Validation message	Medium
TC05	Malicious file	Upload script file	Blocked + logged	High
TC06	Duplicate file	Upload same file twice	Handled (rename/overwrite)	Medium
TC07	Network failure	Disconnect during upload	Upload fails gracefully	High
TC08	File corruption	Upload corrupted file	Validation fails	Medium

Scenario 3 — Shopping Cart (E-commerce)

I - Instruction: Generate test cases for cart functionality

C - Context:

User adds/removes products, updates quantity, applies coupons, checks stock availability.

E - Example:

Add 2 items → Apply coupon "SAVE10"

P - Persona: Act as Senior Test Engineer

O - Output Format: Table

T - Tone: Functional + edge case focused

Test Cases:

ID	Scenario	Steps	Expected Result	Priority
TC01	Add item to cart	Click "Add to Cart"	Item added	High
TC02	Remove item	Remove item	Item removed	High
TC03	Update quantity	Change qty to 3	Price updated correctly	High
TC04	Apply valid coupon	Enter SAVE10	Discount applied	High
TC05	Invalid coupon	Enter ABC123	Error message	Medium
TC06	Out of stock	Add unavailable item	Blocked with message	High
TC07	Price validation	Check total price	Accurate calculation	High
TC08	Cart persistence	Refresh page	Cart retained	Medium

Scenario 4 — Role-Based Access Control (RBAC)

I - Instruction: Generate test cases for RBAC

C - Context:

Roles: Admin, Manager, Viewer. Different access levels for modules.

E - Example:

Viewer tries to delete record

P - Persona: Act as Senior Test Engineer

O - Output Format: Table

T - Tone: Security + access validation

Test Cases:

ID	Scenario	Steps	Expected Result	Priority
TC01	Admin access	Login as Admin	Full access	High
TC02	Manager access	Login as Manager	Limited access	High
TC03	Viewer restriction	Try delete as Viewer	Access denied	High
TC04	Unauthorized access	Access URL directly	Blocked	High
TC05	Role change	Update role dynamically	Permissions updated	Medium
TC06	Session validation	Logout → access page	Redirect to login	High
TC07	API access control	Call API as Viewer	403 Forbidden	High

Scenario 5 — API Testing (User Registration)

I - Instruction: Generate API test cases

C - Context:

POST /register API with JSON payload (name, email, password)

E - Example:

Valid request → 201 Created

P - Persona: Act as Senior Test Engineer

O - Output Format: Table

T - Tone: Technical + validation focused

Test Cases:

ID	Scenario	Steps	Expected Result	Priority
TC01	Valid request	Send valid payload	201 Created	High
TC02	Missing field	Remove email	400 Bad Request	High
TC03	Invalid email	Send wrong format	Validation error	High
TC04	Duplicate user	Same email again	409 Conflict	High
TC05	Password rules	Weak password	Error message	Medium
TC06	Security	SQL injection payload	Blocked	High
TC07	Response schema	Validate JSON response	Matches schema	High
TC08	Performance	Load test API	Response < 1 sec	Medium

Scenario 6 — Mobile App (OTP Login - Android)

I - Instruction: Generate test cases for OTP login

C - Context:

Android app, OTP valid for 60 sec, resend allowed after 30 sec

E - Example:

Enter OTP within validity

P - Persona: Act as Senior Test Engineer

O - Output Format: Table

T - Tone: Real-device + failure scenario focused

Test Cases:

ID	Scenario	Steps	Expected Result	Priority
TC01	Valid OTP	Enter correct OTP	Login success	High
TC02	Invalid OTP	Enter wrong OTP	Error shown	High
TC03	Expired OTP	Enter after 60 sec	OTP expired message	High
TC04	Resend OTP	Click resend	New OTP generated	High
TC05	Network failure	Disable internet	Proper error shown	High
TC06	Auto-read OTP	SMS received	Auto-filled	Medium
TC07	Multiple attempts	Wrong OTP 5 times	Account blocked	High
TC08	App background	Switch app	Session maintained	Medium

Scenario 7 — Dashboard / Report Generation

I - Instruction: Generate test cases for reports

C - Context:

User generates reports in PDF/Excel with date filters and role-based access

E - Example:

Generate sales report for last 30 days

P - Persona: Act as Senior Test Engineer

O - Output Format: Table

T - Tone: Data accuracy + usability focused

Test Cases:

ID	Scenario	Steps	Expected Result	Priority
TC01	Generate report	Select date → generate	Report created	High
TC02	Format validation	Export PDF/Excel	Correct format	High
TC03	Data accuracy	Compare with DB	Data matches	High
TC04	Invalid date	Start > End date	Error message	Medium
TC05	Large data	Generate large report	No crash	High
TC06	Role access	Viewer access report	Limited view	High
TC07	Download report	Click download	File downloads	High
TC08	Performance	Generate report	<5 sec response	Medium
